Relocations with Purpose and Savings

Moving offices shouldn't just be about transporting crates and relocating furniture it can also provide real opportunity to demonstrate your commitment to ESG and create lasting impact. Waste to Wonder Worldwide offers a Move Management Service that combines efficiency, sustainability and cost savings.

By working with us, your relocation will be positively contributing to carbon reduction as well as supporting schools and charities worldwide.

In fact, just by engaging with us you are demonstrating your ESG credentials because Waste to Wonder Worldwide are a **Platinum Certified Carbon Neutral Company**.

How and Why?

**Better than
Carbon
Neutral**
Office Clearances

Directly Funding Education Initiatives

Proceeds from our Relocation Service help to fund our School in a Box program, which has delivered over £55 million worth of second-life furniture to 1,700 schools across 50 countries. Your relocation supports educational resources for underserved communities worldwide. For larger relocation projects, Waste to Wonder Worldwide sponsor an entire School in a Box shipment on your behalf, creating direct educational support for underserved communities.

Achieve Your B Corp and Carbon Neutral Goals

We proudly provide an NCZ Platinum-certified, "Better than Carbon Neutral" service. This certification ensures that all unavoidable emissions are offset, while our commitment to reuse further reduces environmental impact—a standard most moving companies simply can't offer.

Relocation engagement process

Our fully managed, ethical relocation service handles every aspect, ensuring a smooth, socially impactful, and environmentally conscious move.

1. Strategic Planning and Impact Assessment

We start by collaborating with your team to assess relocation goals, access for logistics, and sustainability impacts. This planning phase includes a complete timeline and budget, covering all aspects from packing to final delivery, emptying of crates and if necessary clearance of redundant items.

We also conduct a sustainability assessment to ensure each step aligns with your ethical and environmental goals.

2. Internal Asset Relocation and External Charitable Reuse

Internal Relocation for Retained Assets

- For items you intend to keep, we manage a seamless internal relocation. Assets, equipment and documents are carefully packed into the crates that are provided freely. Our team utilises a detailed site mapping system to ensure each item is placed in its exact area, floor, or location at your new site, minimising setup time and ensuring an efficient transition.

External Charitable Reuse for Unretained Items

- For assets not required in your new location, we take an ethical approach to redeployment, identifying items for donation to our network of charities, schools, and community organisations. This charitable reuse benefits underserved communities globally and aligns with our mission of social impact. We handle all logistics and certifications, providing detailed records that showcase the positive impact your relocation has made.

3. Eco-Friendly Packing and Low-Impact Logistics

We use recyclable, biodegradable, and reusable packing materials to protect your assets while reducing waste. With our green logistics network, we optimise transport, consolidate loads, and use low-emission vehicles where possible, ensuring that your relocation has a minimal carbon footprint.

4. In-House Waste Management and Zero-Waste Execution

As your certified waste management provider, we handle all waste directly, ensuring ethical disposal and recycling for any items unsuitable for reuse. Our zero-waste approach means every item is processed with the highest environmental standards. We document the environmental savings achieved throughout the move, providing you with a comprehensive report on the positive impacts of a zero-waste relocation.

5. Post-Move Support and Carbon Offset Options

Our service doesn't end with the relocation. We provide ongoing support, offering advice on maintaining an eco-friendly workspace. Additionally, we offer carbon offset options through certified environmental projects, ensuring the entire process is carbon neutral and aligns with your sustainability goals.

Ideal for Design and Fit-Out Companies:

If you're planning a new office space, our service aligns with your customer's sustainability goals while ensuring a seamless move.

Further Cost Savings:

When you combine your move with an ethical clearance, we can help you achieve additional cost savings by efficiently coordinating the two services.

Free Crate Hire: * Maximum 10 day hire period

Avoid hidden fees with our complimentary crate hire, making your relocation cost-effective and efficient.

Move and be Moved!

Our Move Management Service goes beyond logistics; it's a way your company can have positive social impact. By working with Waste to Wonder Worldwide on your relocation, you actively contribute to reducing carbon emissions through our reuse initiatives, verified by **life cycle assessments (LCAs)**. Every step of your relocation supports our triple bottom line: reducing environmental impact, advancing social good, and achieving economic value.

Waste to Wonder Worldwide is the largest Certified Social Enterprise in Europe and the Middle East, delivering relocation and ethical reuse services. Using our services contributes to your Social Impact spend targets and demonstrates your commitment to ESG and sustainability best practices.

Whether you're clearing out or just moving in, choosing Waste to Wonder Worldwide means supporting communities and the planet in the most positive way possible.

Understanding the Ethical Clearance Process

1. Survey

We arrange a site survey to assess access and egress, identify the items to be ethically cleared, and determine the labour, logistics, and reuse/recycling routes required. This information is then used to prepare a detailed quotation and costing proposal.

2. Ethical Clearance

All processes adhere to high ethical standards, focusing on reuse and redistribution. We are **Safe Contractor** and **ISO 14001 approved**; we are also **NCZ Platinum Carbon Neutral Certified** with our service delivering Better than Carbon Neutral results.

3. Redistribute

We ensure items are directed to organizations and communities domestically and internationally where they can have the most impact.

4. Report

Detailed ESG reports are provided, showcasing the environmental and social impact of the clearance. Filmed Case Studies can also be produced, examples of which can be found at www.wastetowonder.com
